

September 2016 Success Story

September's story involves the Cheese & Whey industry. AirPro built four fans for a northeastern dairy processing facility. All fans, installed on a whey production system, were required to pass USDA inspection. The pictured fan, processing the hot air at the outlet of the dryer, included 304 Stainless Steel airstream parts (APIC).

Product Description

BIHS 445, Class 5, 360° Discharge, CCW Rotation, Arrangement 1Z, 250°F max design temperature

Application

Induced Draft: Dairy Processing

Performance

52,000 CFM @ 16 in. wg

Features

200 HP Premium Efficiency motor; Unitary base; Spring vibration isolators; 304 SS APIC; v-Belt drive

AirPro's convenient online fan selection software. Curves, drawings, & pricing are all available when you need them.

Words of Wisdom

He is no fool who gives what he cannot keep to gain that which he cannot lose.
